Contract and Health Guarantee

At Turning Point Brittanys, we are committed to breeding a healthy Brittany that is well sound in mind, body and temperament. It is our fervent hope that after you take your Brittany home with you and make him/her a part of your family, that you will find a loving companion as well as a first-class hunting companion and a dog capable of doing whatever you choose to do for the remainder of its natural life.

Up to the point when you take your dog home with you, we will have spent every day with him/her making certain to have exposed the dog to different smells, people, strange sounds (including gunshot) and will have begun the potty-training process leash work and crate training. You will need to continue exposing your young dog as the first 14 weeks of life are very important to their overall sound development.

By the time your puppy goes home with you around the age of 8 weeks, they will have had their initial round of shots and will have been dewormed. We will complete registration with the American Kennel Club prior to you picking up your puppy. We prefer that you begin the registered name of your dog with Turning Point. Additionally, your puppy is nominated for the _____ American Brittany Club futurity. Additional information will be forwarded to you informing you of the upcoming event so you may make your determination at that time as to whether you are going to enter your dog or not. We encourage you to partake in both the field and show with your dog.

We will certify that for the first two years of life, your dog will be free of any genetic health defects. If your veterinarian finds a genetic flaw with your dog that makes it improbable that you will be able to have the life you had wanted with your dog, please contact us directly and we will either take the dog back or give you your money back. Because we only breed the most sound of dogs, we do not believe you will have any health issues. However, even the most perfect recipe for a cake will sometimes not produce a good cake. Should this happen, we will want the dog to also be seen by our veterinarian to determine the extent of genetic flaw.

As the dog's new owner, you will need to take your dog to your veterinarian within one week from taking it home with you. Please provide us with a written report from your veterinarian following this visit. Should you decide not to do this, we will not honor this or any health guarantee.

You will have the dog's hips x-rayed for hip dysplasia shortly after the dog's two-year birthday. You are welcome to do a preliminary x-ray prior to that. However, as this is only a preliminary report and not recognized as a final report by the Orthopaedic Foundation for Animals, you will not need to provide us with any information until the final report after the two-year birthday. As a responsible

breeder, we are most interested in this report as it is an indication of soundness in dogs we have bred. Please plan to provide us with a copy of the final report.

If, at any time, you find yourself unable or unwilling to keep this dog, please call us and make arrangements to return the dog to us. You will not be refunded any of your monies spent over the course of the dog's life. Again, as a responsible breeder, we take the life of our dogs very seriously and are concerned for them for the entirety of their lives. Should you decide to relinquish your dog back to Turning Point Brittany's, you will also relinquish any and all ownership of the dog.

Financial Obligation

Should you decide that a Turning Point Brittany puppy is for you, please make a 50% deposit (\$750) and send it along with this signed contract. We do everything possible to match you up with a puppy that meets your wishes, but, if we are unable to do so your deposit will be fully refunded. Should the pregnancy not take or something happen during the pregnancy your deposit will be fully refunded. The balance due of (\$750) must be received by us two weeks prior to you picking up your puppy.

We wish you the very best with your new Turning Point Brittany. It is our hope that you will be happy with your Brittany for the remainder of its natural life, which we pray is many, many years.
